### DESCRIPTION

Fortador VOLT ELECTRA model 2020 steam washer is probably the only electric device in the world that achieves a maximum pressure of up to 12 BAR or 175 PSI, which is better than the results of the market-leading DIESEL combustion steam cleaning machines. Depending on the individual needs of the user, a machine can be designed for one- or three-phase installations (220V-8Bar or 115 PSI / 400V-12Bar or 175 PSI). Due to the extremely small cubic capacity, it is recommended primarily for cleaning mobile services, car workshops, and auto-detailing studios. Preferred by cleaning companies and hotels. Its small size can trick you, but it is designed to work on two hoses as a working horse. Modern design, top-class workmanship, and maximum product quality. Body like with all Fortador machines made with corrosion-resistant aluminum - all encased in one aggressive designed housing! Make a statement to your clients and competitors presenting your own Fortador powered by Lamborghini.

Fortador VOLT ELECTRA has both the function of steam upholstery washing extractor and steam cleaning with detergent. Hot steam disinfects any surface and thanks to it machine is used in the medical and food industry. VOLT ELECTRA has a built-

---

in professional wet/dry extractor from the reputable company Ghibli & Wierbel, which can be used as an independent device. The product enjoys incredible recognition of environmental experts since does not generate water or chemical waste. It does not require licenses or additional permits.

Our best seller is mainly chosen by office cleaning companies, auto-detailing studios, carpet mobile steam cleaners. Often seen in airports, hotels and other public facilities.

According to German consumers, ranked as a future of the car wash concerning strict CO2 emission standards and freshwater savings (consume only 3.7liter or 1 gallon of water to clean SUV size vehicle).

Modern design and the highest quality components guarantee the position of leader in the industry. Our dealerships are located in Montreal, Miami, Dubai, Pretoria, Hong Kong, New York and most of the European Union. Machines are built under CE norms and standards, Lamborghini Caloreclima, TUV Nord, Florida As, UL CAN / US.
